(54)【発明の名称】 小動物の自然な摂食及び又は飲水欲求を利用した記憶学習能力の測定方法及びその測定装置

(57)【要約】

【課題】 夜行性動物の活動期である暗期にも記録測定できること、実験者による被験動物への接触を実験中、実験前後を通じて極力減らすこと、被験動物に対する侵害ストレスを減らすこと、及びその条件で記憶学習能力を測定評価することにある。

【解決手段】 実験小動物の居室箱2内に設けられた観測室3とホームポジション4、観測室3内の周縁に設けられた複数の給餌部5と給水部6、回転給餌箱7、観測室内の小動物を測定記録する測定記録機器8、各給餌部5及び各給水部6の給餌給水時期を制御し且つ測定記録機器8による小動物の所在部位の経時的变化を算出して解析するコンピュータ12などからなる。

ABSTRACT:

PROBLEM TO BE SOLVED: To enable recording and measuring even during dark time which is an active time for a nocturnal animal, reduce the contact of an experimenter to a test animal during, and before and after experiment as far as possible, reduce nociceptive stress to the test animal, and measure and evaluate memorizing and leaning ability under these conditions.

SOLUTION: This measuring apparatus comprises an observation section 3 and a home position 4 placed in a living box 2 of an experimental small animal, a plurality of feeding parts 5 and water-supplying parts 6 placed at the

surrounding places inside the observation section 3, a rotary feeding box 7, a measuring and recording device 8 for measuring and recording the existence of the small animal in the observation section, a computer 12 for controlling timings of feeding and water-supplying of each feeding part 5 and water-supplying part 6, and calculating and analyzing changes of the existing positions of the small animal with the lapse of time determined by the measuring and recording device 8, etc.
